14. Known Limitations & Items Still In Progress

1 Before You Begin — Important Notes for Testing

All data currently in the system is test data.

Every registration, payment, and ticket you see right now was created to test the system end-to-end. None of it is a real attendee. Please do not treat current counts (e.g. "X registrations" or "Y checked in") as real figures — everything will be reset/cleared before the platform opens to real registrants.

This manual walks through every section of the Admin Panel at `events.agfiji.org/admin`, in the order it appears in the sidebar. As you test, please try each feature described here and let us know:

- Anything that doesn't behave the way this manual describes;
- Anything confusing or unclear in the wording/labels;
- Any feature you expected to find but couldn't (check Section 14 first — some are already known and planned).

Tip

It's safe to click around. Approving or cancelling a *test* registration, logging a *test* payment, or sending a *test* email will not affect anything real. If you're ever unsure whether an action is reversible, this manual notes it — look for the caution boxes.

2 Logging In & Password Reset

Logging in

1. Go to `events.agfiji.org/admin` — you'll be redirected to the login page automatically if you're not signed in.
2. Enter your email address and password.
3. Click **Sign In**. You'll stay signed in for 7 days on that browser.

Each admin user has their own named login (see Section 11 — Staff Accounts). There is no longer a single shared admin password — every action that touches money is now attributed to the specific staff member who did it.

Forgot your password?

1. On the login page, click **Forgot password?**
2. Enter your email address and submit.
3. If an account exists for that address, you'll receive an email with a reset link. This link expires after **1 hour**.
4. Follow the link, choose a new password (minimum 8 characters), confirm it, and submit.
5. You'll be redirected to the login page to sign in with your new password.

Note

For privacy, the system always shows the same "check your email" message whether or not that email address actually has an account — this is intentional and not a bug.

3 Dashboard

The first screen you see after logging in. It's a read-only overview — nothing here can be edited or clicked into.

- **Four summary tiles:** Total Registrations, Confirmed Payments (with pending count alongside), Pending Payments, and Venue Capacity used (%).
- **Recent Registrations:** the last 5 registrations submitted, with name, category, how long ago, and a Confirmed/Pending badge.
- **Registration by Category:** a simple bar breakdown showing how many registrations fall into each category (Very Large Church, Large Church, Individual, etc).

The dashboard loads once when you open the page. Refresh your browser to see the latest numbers.

4 Events

An "Event" is a top-level occasion (e.g. the Centenary Celebration) that Venues and Registrations attach to.

Creating or editing an event

1. Click **Add Event** (or select an existing event to edit).
2. Fill in: Name, URL Slug (auto-generated from the name, but you can override it), Short Description, Full Description, Start & End date/time, Location, and Status (Draft / Published / Cancelled / Completed).
3. Optionally upload a banner image (JPEG, PNG, WebP or GIF, up to 10MB) by dragging it in, clicking to browse, or pasting an image URL.
4. Click Save.

Deleting an event is permanent

Deleting an event also deletes every venue and registration attached to it. The system will warn you before this happens — please read that warning carefully during testing.

Assigning venues to an event

While editing an event, an "Venues" panel lets you: create a new venue directly under that event, attach an existing unassigned venue to it, detach a venue (without deleting it), edit venue details inline, and see each venue's capacity fill as a progress bar.

5 Venues

A global list of every venue across all events — useful for a birds-eye view of capacity.

- **Filter tabs:** All / Assigned to an Event / Unassigned.
- **Summary card:** overall capacity %, seats filled vs. total, number of active venues, seats still available, and how many venues aren't assigned to an event yet.
- **Each venue card** shows a capacity progress bar, registered vs. available seats, which event it belongs to, and a warning badge once it reaches 80% ("Approaching capacity") or 100% ("At capacity").
- **Create / Edit / Delete:** Name, Capacity, City, Address, Description, and an Active toggle (turning a venue inactive stops new registrations from selecting it).

6 Registrations

Every registration submitted through the public registration form appears here, newest first — church group registrations and individual registrations alike.

Finding a registration

- Use the **search box** to find someone by name, registration ID, or email.
- Use the **Category** filter (e.g. Large Church, Individual) and the **Payment** filter (Confirmed / Pending) to narrow the list.

Approving a bank transfer registration

Registrations paying by bank transfer sit as **Pending** until someone verifies the money has actually arrived (typically checked against the bank statement, then logged — see Section 7).

1. Once you've confirmed the funds, click **Approve** on that row (or "Verify & Approve" from the row's options menu (the three-dot icon)).
2. Confirm the pop-up dialog.
3. The system will: mark the registration as paid, generate that registrant's QR tickets, and automatically email their ticket confirmation.

Note The Approve button only appears for registrations that are Pending and paying by bank transfer — online card payments confirm themselves automatically and never need manual approval.

Cancelling a registration

This action is irreversible

Cancelling a registration invalidates all of that registrant's QR tickets (they will no longer scan at check-in) and releases their seats back into the venue's available capacity. Use the row's options menu (the three-dot icon) → **Cancel Registration**, and confirm the pop-up. Cancelled registrations remain visible in the list, shown greyed-out/struck-through, for record-keeping.

Not yet available

The "**View Details**" menu item and the "**Export CSV**" button on this screen are visible but not yet functional — please don't worry if clicking them does nothing. To export registration data today, use the **Reports** section (Section 7), which has a fully working Registration Report export.

7 Finance Ledger

This is where all money — bank transfers, cash, and online payments — is tracked against each registration. Every entry here is permanent and attributed to the staff member who logged it, so it forms a full audit trail.

Reading the ledger

Each row shows: Registration ID, Church/Name, Payment Plan (Full, or Partial with the number of installments), Total Fee, Amount Paid so far, and Remaining Balance. Use the **search box** to find a registration by ID, church name, category, or payment status.

Registrations on an installment plan that have passed their payment deadline with money still owing are automatically flagged with an **Overdue** badge.

Logging a payment

1. Click into a registration's row to open **Log Payment**.
2. You'll see the Total Fee, Amount Paid, and Remaining Balance at the top, and the full payment history below (every past entry, who confirmed it, and any notes).
3. Enter the new payment: Amount (FJD), which Installment number this is (optional), Payment Type (Installment or Lump Sum/Full), Method (Bank Transfer / Cash / Online), and a free-text reference field for bank reference numbers, teller name, branch, or any notes.
4. Submit. The entry is added to the audit trail — it cannot be edited or deleted afterwards. If you need to correct a mistake, log an offsetting entry rather than trying to remove the original (this is by design, to protect the financial record).

If a payment brings the registration's total up to the full fee, the system automatically marks it Completed, generates QR tickets, and emails the registrant their tickets — the same as an approval in Section 6.

Logging a payment also automatically emails your Finance mailbox a notification, and emails the registrant a balance update — no extra step needed.

8 Reports & Export

Seven report types are available, each downloadable as CSV or Excel (XLSX):

Report	What it contains
Registration Report	Full registration & attendee details — names, contacts, category, adults/youth/kids counts, venue, ticket numbers, payment status.
Payment Status Report	Every payment confirmation/pending item and revenue, with totals at the bottom.
Venue Capacity Report	Capacity, registered, remaining seats and % utilised per venue.
Category Breakdown	Registrations, % of total, attendees and revenue per category.
Check-In Report	Attendance per ticket — who checked in, which days, how many times.
Church Directory	Church contact and attendance details for church-type registrations.
Finance Ledger	Exportable version of the ledger in Section 7 — fee, paid, remaining, per registration.

A **Quick Export** option at the top lets you combine a Date Range (All Time / Today / This Week / This Month), a Category filter (All / Churches Only / Individuals Only) and a Format (CSV/XLSX) into one download of the Registration Report.

Note Date range and category filters apply to every report except Venue Capacity, which is always a full snapshot.

9 Check-In System

Used at the venue door on event day(s) to scan attendees in and out. Each individual ticket has its own QR code and is tracked separately — even within the same family or church group.

Scanning

- Click **Start Scanning** to activate your device's camera and point it at an attendee's ticket QR code.
- If the camera isn't available (or a ticket won't scan), use the **Manual Ticket Entry** box to type the ticket number instead.
- The system automatically decides whether this is a check-in or check-out — you don't need to choose:
 - First scan of the day, or their last scan was a check-out → **Check-in** (marked "Re-entry" if they're returning after already checking out once today).
 - Their last scan was a check-in → **Check-out**.
- Invalid ticket formats, unrecognised tickets, and **cancelled** tickets are all rejected with a clear on-screen message and will not be let in.

Force Checkout

A separate manual field lets staff force-record a checkout for a ticket number (e.g. if someone left without scanning out). If there's no matching check-in for that ticket that day, the system automatically flags it as an anomaly for later review.

Live stats

The screen shows: Checked In Today, Checked Out Today, Currently Inside (split by Adult/Youth), and today's check-in rate as a percentage — refreshed automatically every 30 seconds, or manually via the Refresh button. An Activity feed lists every scan as it happens, and a Flagged Anomalies panel lists anything that needs review, with a Resolve button to clear it once checked.

Check-in day "resets" at midnight Fiji time.

10 Email Templates

Six automated emails are sent by the system, and every one of them can be customised here without needing a developer.

Template	Sent when...
Registration Received	A registrant submits a bank-transfer registration.
Admin Notification	A new bank-transfer registration needs to be verified by staff.
Ticket Confirmation	Staff approve a bank-transfer registration (includes QR tickets).
Online Payment	A registrant completes an online card payment (includes a PDF ticket attachment).
Finance — Payment Logged	A staff member logs any manual payment in the Ledger (Section 7).
Registrant — Balance Update	Sent to the registrant every time a payment is logged against their registration.

Editing a template

1. Select the template tab at the top.
2. Edit the Subject line, Tag (small heading text), Heading, Body (using the formatting toolbar — bold, italic, headings, lists, alignment, links), the Call-to-Action button (label + link — leave either blank to hide the button entirely), and the Closing text.
3. Open the **Variables** panel to see which `{{placeholders}}` this template supports (e.g. registrant name, fee, bank details) — click any variable to copy it, then paste it into your text.
4. Click **Preview** to see exactly how it will look with sample data filled in.
5. Click **Send Test** and enter your own email address to receive a real test copy (marked "[TEST]" in the subject) before saving.
6. Click **Save Template** to make it live, or **Reset to Default** to discard your changes and restore the original wording.

Note The registration details, bank transfer info, and QR ticket blocks in each email are inserted automatically by the system and can't be removed — you're only editing the surrounding message text.

11 Staff Accounts

Each staff member who needs admin access gets their own login, rather than sharing one password. This lets every payment approval or logged payment be attributed to a named person.

Role	What it means today
Super Admin	Everything Admin/Finance can do, plus the ability to add, edit, and deactivate other staff accounts.
Admin	Full access to Registrations, Ledger, Check-In, Reports, Email Templates, Settings, Events and Venues.
Finance	Same access as Admin today — this role exists to label finance-focused staff and may carry additional restrictions in future.

Adding a staff member

(*Super Admin only*) Click **Add Staff Member**, fill in their name, email, a temporary password, and choose a role, then save. They should change their password via the Forgot Password flow (Section 2) on first login.

Deactivating a staff member

Click **Deactivate** next to their name and confirm. This is a soft deactivation — their login stops working, but their historical payment approvals remain in the audit trail exactly as before. A Super Admin cannot deactivate their own account.

Not yet available

There is currently no "Reactivate" button for a deactivated staff member in this screen — if you deactivate someone by mistake during testing, let us know and we'll re-enable it for you directly.

12 Settings

- **Bank Transfer Details:** Bank Name, Branch/BSB, Account Name, and Account Number — this is exactly what registrants see on the payment screen and in their confirmation email, so please review it carefully for accuracy.
- **Admin Notification Email:** the inbox that receives an alert every time a new bank-transfer registration comes in.

Note

The "Finance" notification inbox (which receives an alert every time a payment is logged in the Ledger) is currently set at the database level rather than in this screen — let us know if you'd like this changed and we'll update it for you.

13 Reference: Registration Categories & Fees

Category	Type	Fee (FJD)	Registration limit
Very Large Church (500+ members)	Church	\$10,000	5
Large Church (200–499)	Church	\$5,000	50
Medium Church (100–199)	Church	\$3,000	132
Small Church (50–99)	Church	\$1,000	175
Church Plant (under 50)	Church	\$500	38
World Fijian Congress (overseas network reps)	Church	\$0	5
WFC Partners (missionaries/partners)	Individual	\$0	—
Individual Attendee (self + up to 9 others)	Individual	\$100	—

Within a church registration, attendees are split into **Adults** (26+), **Youth/NextGen** (13–25), and **Kids** (6–12). Adults and Youth each receive their own numbered QR ticket; Kids do not receive a ticket, by design.

Installment plans allow 5–10 instalments, with a final payment deadline of **30 September 2026** for all installment plans.

These fees, limits, and the installment deadline are fixed in the system configuration. If any of these numbers need to change, please let us know and we'll update them for you — they aren't editable directly from the admin panel.

14 Known Limitations & Items Still In Progress

Please review this list before reporting an issue — these are already known:

- **Not wired up** "View Details" and "Export CSV" on the Registrations screen (Section 6) — use Reports (Section 8) for exporting registration data in the meantime.
- **Not available** There is no admin screen for managing the church list — it's a fixed reference list used only for lookup during public registration.
- **Not available** No "Reactivate" button for deactivated staff accounts (Section 11) — contact us if needed.
- **Config only** Finance notification email (Section 12), registration fees/limits, and the installment deadline (Section 13) can currently only be changed by us directly, not from the admin panel.
- **Cosmetic today** The Finance vs. Admin role distinction (Section 11) doesn't yet restrict access differently — both currently have the same permissions.

How to give feedback

As you test, please note the page/section, what you expected, and what happened instead — screenshots are very helpful. Send feedback to our development contact and we'll prioritise fixes and answer any questions.
