Selected church name. Clicked on Continue.

Able to scroll down and go back. Then change the name, which empties the Find your church text box.

Is 'Registrar' the best word to use here? Can it say, 'Name of person filling out this form'?

'The person filling out this form' can be removed. This will bring the 2 text boxes to be level with each other.

Attendee list showed max 500 adults, 550 youth

Able to download attendee list template quickly. Entered WM and Men in some age category fields. After uploading the file, an error message identified the error.

Attendee List (Adults & NextGen Youth)

Upload a CSV or Excel file naming every adult and NextGen Youth (15–25yrs) attending — each gets their own ticket with their name printed on it. Do not include kids — list them in the Kids headcount below instead. **(max 500 adults, 550 youth)**

One row per attendee — Adults & NextGen Youth (15–25yrs) only. Do not include kids; they're counted separately below. [Download template](#)

80 attendees ready 245 rows with errors

Adults **0** Youth **80** Total **80**

Row	Name	Age Category	Status
31	George Avery Ansley Wells	WM	Age Category must be "Adult" or "Youth" (got "WM")
32	Kelsie Paul Maggie Baird	WM	Age Category must be "Adult" or "Youth" (got "WM")

I corrected the excel file and re-uploaded it. It overrides the first file which is good. Speed was good. There was no instruction for user to show them they don't need to delete the first file. Some users may get stuck here.

I was not able to open csv file on mobile. Instructions at the beginning should tell users to use a laptop if they're registering a church, because of the attendee list that is required.

Did not add email addresses or phone numbers and file was able to be saved and uploaded. This is good.

Status is updated.

325 attendees ready

Adults **310** Youth **15** Total **325**

Row	Name	Age Category	Status
4	Cayden Lozano Devan Weiss	Youth	Ready
5	Abraham Carpenter Kayley Martinez	Youth	Ready
6	Tiana Yates Cassandra Shaw	Youth	Ready

Kids numbers updated. Total registered adds up correctly. Total due \$10k is correct.
